

ITC Systems' coin operated controllers are the ideal solution for charging for the use of copiers, printers and other serial applications.

BENEFITS AT A GLANCE

- Charges for the use of printing and copying
- Accepts local currency
- Hassle-free installation
- Eliminates the need for a full-time attendant
- Accounting of cash in system made easy
- Reporting capabilities available to track usage
- Configurable pricing can be adjusted with ease
- No extra stand required
- Easily mounted to copier using accessories
- Reduced shipping costs

APPLICATIONS

- Libraries
- University & College Campuses
- Copy and Print Centers
- Government Records Offices
- Convenience & Grocery Stores

FUNCTIONALITY

ITC Systems' "Fusion" is our first ever one-piece coin operated controller. It is designed to streamline setup, installation and operation compared to current offerings, which typically are composed of two pieces (coin-op and stand). The 'Fusion' series is reengineered to offer a reduction in overall weight and space for ease of shipping and handling. The 'Fusion' series is available in ITC Systems' popular 5300F and 5400F models.

Both the 5300F and 5400F models represent the latest in coin-op technology and are the finest available on the market today.

The 5300F is the economical choice for your basic coin-op needs. It is perfect for any single application use such as printing or copying. The 5300F series comes with one serial port, copier I/O port, LCD, bypass key, out of change light and more.

Fusion Model 5420

The 5400F model is the latest and most advanced in coin-op technology, featuring serial ports, a USB port, and multiple copier I/O ports. One 5400F can connect with up to three different applications (i.e. copy/print) to control and charge for use. The 5400F comes fully equipped with copier specific cables for effortless connection and reporting. This model is truly multifunctional.

The 5400F coin-op is capable of any combination of coin, bill and card operation. The 5300F offers your choice of coin or bill acceptance. Every coin-op comes with ITC Systems' standard warranty.

With the main control board mounted directly to the top of the housing, we eliminate 42 potential points of failure.

ITC Systems continues to supply the most durable and fully featured products on the market.
