

These key components in Cash Card revenue systems act as 24-hour cashiers to dispense and/or add value to magnetic cards or online accounts.

BENEFITS AT A GLANCE

- Accepts currency and credit cards
- Requires no operator
- 24 hour accessibility
- Cash flow is streamlined
- Some funds added to cards may not be used

APPLICATIONS

- College & University campuses
- Libraries
- Food Service facilities
- Copy & Print centers
- Laundromats
- Business centers
- Gaming halls

FUNCTIONALITY

ITC Systems designs and manufactures three Cash Card Loader configurations, plus a Low Cost Loader and a Card Dispense unit. The fully featured Loader series can be configured for online account-based and stored-value magnetic card use. The LC Loader is the economical model, and the Card Dispenser issues CR80 cards.

Due to the minimal operator assistance required, these card handling systems are ideal for use in busy locations where staff time is at a premium and self-service is a requirement.

The Loaders can be made to accept any combination of coin,

bill or credit card payments. All configurations contain internal meters to count and track deposits, outgoing card values, bonus settings, diagnostics and TCP/IP connectivity. Model 1580 handles stored value magnetic cards. All ITC Systems Cash Card Loaders are made using a high security steel cabinet with a secure T-handle lock.

The NetLink Loader, model 7080, handles ABA Track 2 cards and is designed to add value to online accounts on a self-serve basis via standard TCP/IP networks. The Cash Card Kiosk is a fully-featured loader equipped with an intuitive touch-screen.

For secondary areas suited to a more simplistic revaluing option the LC Loader, model 1085, is the perfect solution. This model offers a popular and inexpensive option for dispensing and loading value on to stored value magnetic stripe cards. Designed for optimum customer convenience, the 1585 accepts \$1, \$5, \$10 and \$20 US bills.

ITC Systems' Card Dispenser, model 1048, is the ideal way to sell cards 24 hours a day with no operator required. This user-friendly machine dispenses cards with a predetermined value on them.
